ROSIE MOORE

Maine, Mexico and More

by Margery Irvine

Central to Rosie Moore's work are two qualities that may appear to be odds with one another: it is fresh and seemingly unstudied and, at the same time, confident and self-assured. The spontaneity so evident in her paintings engages and delights us; we sense a feeling of freedom from restraint accompanied by control of the medium.

These two contradictory qualities, which could cause dissonance, instead combine to give us art of harmony and unity. Nowhere do we see the seamless coming together of such freedom/restraint more clearly than in her still lifes. These beautifully composed canvases, filled with shapes and a complex array of color, come to us with immediacy; although we know the hand behind them worked with thought and care, their impact is very much in the present.

Inspired by her time spent in Maine and Mexico, Moore's vibrant colors sing to us, engendering even

more the illusion of something happening in the Now. And the carefully composed shapes are given life by the unexpected: the almost spectral white pitcher that seems to float above the table, the touch of orange on a goblet, the portrait beneath a cross. Complications of space indeed. For when else can the unexpected surprise us but in the moment we confront the canvas?

Similarly fresh and effective are Moore's impressionistic land- and seascapes that seem to convey first impressions of place. Never appearing overworked, they capture fleeting moments with brush strokes that suggest rather than insist. A green sea, a blue door; Moore is an artist who stands with us in front of her canvas and says, "Hear the waves. Feel the sun."

Perhaps most admirable about Moore's work, though, is her ability to maintain tension in her paintings: our heads tell us that an artist with great experience and control has painted them; our hearts, on the other hand, simply feel uplifted in their presence.

La Noche, oil on canvas, 31 x 31 inches

Pink Interior, oil on paper, 29 x 29 inches
